WHERE MUSIC AND SCIENCE COLLABORATE

Rufus Cappadocia & Darcy Hepner Duo

Drawing from their unique and eclectic backgrounds and experiences in classical, jazz, and contemporary idioms, various world music influences informed by a strong sense of composition and improvisation, they create music steeped in adventure, meditation and inspiration.

Dr. David Earn

Featuring a brief guest lecture by Dr. David Earn from the Dept. of Mathematics and Statistics, McMaster University. Dr. Earn applies mathematics to epidemiology, ecology and evolutionary theory, as well as music perception and music theory.

About the LIVE Lab

The LIVE (Large Interactive Virtual Environment) Lab is a one-of-a-kind 100 seat Research Performance Hall designed to investigate the experience of music, dance, multimedia presentations, and human interaction. Series 10dB is a concert series which unites musicians from a range of disciplines with the technical expertise of the LIVElab, creating sensory environments and musical experience like no other.
